

Mukeshkannan Manokaran

Summary

Android Developer with 5 years' experience & have published more than 30 apps in play-store, have had hands on Proto-typing: Figma, Adobe XD, Sketch, Designing: Photoshop. Worked in a Collaborative environment with Git, VSTS, Trello etc. Seeking a responsible career where my abilities can be highly utilized in a growth oriented and professional environment

Experience

Senior Software Engineer - 12/2021 to Present

Utthunga Technologies Pvt Ltd, Bangalore

- Android application development
- Work on apps communication via USB & BLE
- Maintain Unit Test report
- Analyze and implement new technologies
- Working with Git Versioning & Project management tools

Project #1: ACT Activator

Description: App used the ACT net engineers to activation, deactivation & shifting of network hardware devices.

Language: Java

Platform: Android Studio

Team Size: 8

Other: Databinding, Git, Property files,

Project #2: One Wireless App

Description: App communicates with wireless hardware (IOT device) via BLE to read information and update information from mobile app to hardware device of Honeywell.

Language: Kotlin

Platform: Android Studio

Team Size: 2

Other: Databinding, MVVM, BLE communication, Git, RX Java, Dagger.

Project #3: TSC900

Description: App communication to IOT wired device via USB. The readings of the hardware (voltage, temperature, etc..) are read and displayed on the application. The work was mainly focused on performance improvement of the existing application. App after 2hrs, 8hrs, 24hrs either hangs or crashes as Heap memory kept on increasing, performance was improved after fixing

Language: Kotlin
